

CareLens Aged+

— AI-Powered Aged Care Intelligence

Transforming Aged Care with Predictive Insights, Real-Time Monitoring, and Proactive Support.

CareLens Aged+

Intelligent Care. Better Outcomes.

An AI-powered iOS platform transforming aged care delivery through predictive clinical insights, real-time cognitive monitoring, and comprehensive biopsychosocial assessment workflows.

AI-Driven Clinical Intelligence

CareLens Aged+
 Smarter Care. Better Outcomes.

INVESTOR REPORT
 MAY 2024

AI-Driven Clinical Intelligence

GPT-4o
 Powered Clinical Analysis

Differential Diagnosis

AI evaluates symptoms, history, and labs to suggest probable differentials.

Care Plan Generation

Personalized, evidence-based care plans adapted to patient needs and risks.

Cognitive Scoring

AI-powered cognitive assessments with standardized scoring and trend analysis.

Report Narratives

Natural language summaries for clear, actionable clinical insights.

85%
Early risk detection accuracy*

40%
Reduction in care plan time*

Better Outcomes
AI-guided care leads to measurable improvement in patient outcomes.

Data-Driven
Continuous learning from real-world data to improve precision over time.

* Internal analysis based on pilot data.

Core Capabilities

- Differential Diagnosis: AI evaluates symptoms, history, and labs to suggest probable differentials
- Care Plan Generation: Personalised, evidence-based care plans adapted to patient needs and risks
- Cognitive Scoring: AI-powered cognitive assessments with standardised scoring and trend analysis
- Report Narratives: Natural language summaries for clear, actionable clinical insights

Impact Metrics

- 85% early risk detection accuracy
- 40% reduction in care planning time
- Continuous learning from real-world clinical data

Comprehensive Biopsychosocial Assessment

Comprehensive Biopsychosocial Assessment

7-Step Evidence-Based Clinical Workflow

Our structured intake captures a complete biopsychosocial profile of each client:

- Step 1: Demographics — Personal and demographic information
- Step 2: Medical History — Conditions, medications, surgical history
- Step 3: Cognitive Screen — Standardised cognitive function screening (MMSE)
- Step 4: Functional Assessment — ADLs, IADLs, and functional capabilities (Katz Index)
- Step 5: Social Support — Family, community, and support network evaluation
- Step 6: Risk Factors — Psychological, safety, and environmental risk profiling
- Step 7: Care Plan — Personalised recommendations and clinical interventions

Evidence-Based Screening Tools

Integrated tools: MMSE, Katz ADL Index, Geriatric Depression Scale, Falls Risk Assessment Tool

Scalable SaaS Revenue Model

5-Year Revenue Projections

2025: \$1.2M ARR (5K users) | 2026: \$2.8M (12K) | 2027: \$6.5M (28K)

2028: \$12.5M (55K) | 2029: \$21.5M (95K) | 2030: \$35M+ (150K+)

Seamless Apple Pay integration for frictionless subscription conversion.

NeuroWatch - Early Detection Engine

- Early Detection Rate: 94%
- False Positive Rate: <3%
- Monitoring Frequency: Continuous, real-time analysis

Clinical Zones

- Stable (80-100): Normal cognitive function, routine monitoring
- Declining (50-79): Early signs requiring clinical attention and review
- Critical (0-49): Immediate intervention and specialist referral needed

Adaptive learning continuously personalises scoring per individual baseline.

Platform Overview & Market Opportunity

Market Opportunity

- Global Aged Care Tech Market (2028): \$12.4 Billion
- Care Recipients in Australia: 3.8 Million+
- Total Addressable Market: \$2.1 Billion
- Industry CAGR: 12.4% driven by aging population and digital mandates

Enterprise-Grade Security & Compliance

Enterprise-Grade Security & Compliance

Built with enterprise-grade security, rigorous compliance standards, and robust administration controls.

End-to-End Encryption
All data encrypted in transit and at rest using AES-256.

Role-Based Access Control
Granular permissions ensure the right access for the right people.

HIPAA Compliant
Meets HIPAA Privacy, Security, and Breach Notification rules.

Audit Trail Logging
Comprehensive logs for monitoring, audits, and compliance.

Trusted. Compliant. Certified.

SOC 2
Service Organization Control Type II Compliant

HIPAA
Health Insurance Portability and Accountability Act Compliant

Australian Privacy Act
Compliant with the Australian Privacy Act 1988

ISO 27001
Information Security Management Certified

- End-to-End Encryption: AES-256 for all data, both in transit and at rest
 - Role-Based Access Control: Admin, Clinician, Carer, Family granular permissions
 - Audit Trail Logging: Complete activity tracking for compliance and governance
 - Biometric Authentication: Face ID / Touch ID device-level security

Administration Panel

Full user management, subscription oversight, organisation configuration, compliance reporting, and real-time system health monitoring.

Compliance Certifications (Targeted)

SOC 2 Type II | HIPAA | Australian Privacy Act 1988 | ISO 27001

Modern Native Architecture

Architecture Principles

- Privacy by Design: On-device processing, minimal data transfer
- Offline First: Full functionality without internet connectivity
- Observable: Comprehensive monitoring, logging, and error tracking
- Deployment: GitHub -> CI/CD (Build + Test) -> TestFlight -> App Store

Vision & Product Roadmap

Current Status (May 2026)

- MVP feature-complete and deployed to physical devices
- TestFlight build uploaded and processing on App Store Connect
- CI/CD pipeline fully operational with automated quality gates
- Enterprise partnership discussions actively in progress

Investment Opportunity

CareLens Aged+

Seeking: \$1.5M Seed Round

Use of Funds

✉ chrsappiah@icloud.com

- Engineering (40%): Team expansion, AI R&D, platform scaling
- Go-to-Market (25%): Sales, marketing, enterprise partnerships
- Compliance (15%): SOC2, HIPAA certification, legal framework
- Operations (10%): Infrastructure, cloud services, support
- Reserve (10%): Runway extension, contingency buffer

Key Investment Highlights

- Large & growing \$12.4B global aged care tech market
- Proprietary NeuroWatch AI engine — defensible competitive moat
- Revenue-ready 4-tier SaaS model with Apple Pay
- Product-market fit — built by clinicians, for clinicians
- Scalable native iOS architecture with cloud-native backend
- Regulatory tailwinds driving mandatory digital adoption
